

INDUS Technology Achieves CMMC Level 2 Certification (C3PAO)

San Diego, California – INDUS Technology, Inc. (INDUS) has achieved Cybersecurity Maturity Model Certification (CMMC) Level 2 following a successful, independent assessment conducted by an authorized Certified Third-Party Assessment Organization (C3PAO).

CMMC Level 2 certification confirms that INDUS has implemented and institutionalized cybersecurity practices and processes required to protect Controlled Unclassified Information (CUI) across its information systems in accordance with Department of Defense (DoD) requirements and NIST Special Publication 800-171. This achievement demonstrates INDUS's ability to meet the security standards necessary to support DoD programs operating within the Defense Industrial Base.

“CMMC Level 2 certification is a significant milestone that reflects our disciplined approach to cybersecurity and our commitment to supporting secure mission execution,” said Eric MacGregor, President and CEO of INDUS Technology.

As the DoD continues to incorporate CMMC requirements into acquisition programs, this certification positions INDUS to compete for and perform on contracts requiring verified protection of sensitive information. INDUS remains focused on delivering secure, compliant solutions that align with evolving federal cybersecurity mandates and mission requirements.
